

Advanced Website Preventative Maintenance

Your website is a valuable asset and investment to your business and just like a car requires regular maintenance to ensure that it keeps running smoothly. Without regular backend maintenance your website will become vulnerable to attack from hackers and your website will crash. It's not a matter of IF but WHEN.

Our Advanced Website Preventative Maintenance program offers you peace of mind in the knowledge that when your site comes under attack it will be secure, backed up and monitored.

Website AntiVirus + Website Firewall (WAF)

In the event of an attack we use Securi the security experts to thoroughly scan, clean, monitor & protect your website. The Securi security software will automatically block your website's vulnerabilities from any further attacks. Securi provide peace of mind for over 30,000 website owners just like you.

Security Maintenance:

- Malware Removal & Clean Up Unlimited Pages
 - Automatic Scans for Malware & Hacks
 - Blacklist Scanning & Monitoring
 - Block Hackers with Website Firewall
 - Advanced Denial of Service (DDoS) Protection
-

Website Maintenance:

- Weekly website Backups
- Plugin Backups
- Core File Backups
- Database Maintenance
- Premium Theme Updates
- 24/7 Monitoring
- Monthly Reports (If Requested)
- Minor content or image updates*

For a low yearly subscription of \$595.00 you can rest assured that your website investment is up to date safe and secure. Don't risk your site becoming vulnerable to attack from unscrupulous hackers.

*Minor updates means we will allocate 60 mins of development time per month to make changes to content (i.e. change, add or remove text. add, change or remove images)
